

WPPI Energy Plans to Build Solar Farm

WPPI Energy and NextEra Energy Resources, a subsidiary of NextEra Energy, Inc. (NYSE: NEE), today announced plans to build a 100 megawatt solar energy center – Wisconsin’s largest – with a capacity to serve more than 23,000 people with affordable, clean energy.

“This solar energy center adds diversity to WPPI Energy’s power supply portfolio in a way that’s more cost-effective than other opportunities currently available to us,” said Mike Peters, president and CEO of WPPI Energy. “In addition, WPPI Energy has achieved significant emissions reductions over the past 10 years, and the clean, renewable energy generated by this project will help us continue that effort.”

WPPI Energy has entered into a 20-year power purchase agreement to buy the electricity from the solar energy center to serve its 51 member utilities and their customers across Wisconsin, Upper Michigan and Iowa.

“We are pleased to partner with WPPI Energy to bring the largest universal solar energy center to Wisconsin,” said Mike O’Sullivan, senior vice president of development for NextEra Energy Resources, the world’s largest generator of renewable energy from the wind and the sun. “This energy center will harness the state’s own sunshine to create clean, renewable energy, as well as good-paying jobs and increased tax revenue for the state and local community.”

NextEra Energy Resources plans to build and operate the Point Beach Solar Energy Center on land adjacent to its existing Point Beach Nuclear Plant in Two Rivers. The project will create 150-200 jobs during its construction period, which typically lasts six to nine months. The Point Beach Solar Energy Center is scheduled to come online in 2021.

About NextEra Energy Resources

NextEra Energy Resources, LLC (together with its affiliated entities, "NextEra Energy Resources"), is a clean energy leader and is one of the largest wholesale generators of electric power in the U.S., with approximately 18,260 megawatts of generating capacity, which includes megawatts associated with non-controlling interests related to NextEra Energy Partners, LP (NYSE: NEP), primarily in 25 states and Canada as of April 2016. NextEra Energy Resources, together with its affiliated entities, is the world’s largest generator of renewable energy from

the wind and sun. The business operates clean, emissions-free nuclear power generation facilities in New Hampshire, Iowa and Wisconsin as part of the NextEra Energy nuclear fleet, which is one of the largest in the United States. NextEra Energy Resources, LLC is a subsidiary of Juno Beach,

Fla.-based NextEra Energy, Inc. (NYSE: NEE). For more information, visit www.NextEraEnergyResources.com.
